Mounting

Assemble the camera mount as shown and fix it to a stable surface using the screws and plugs provided. Do not mount the camera outside or anywhere that could expose it to water.

Connecting power

Connect the power adapter to the DC-IN socket on the camera as shown.

Connecting to a network

Connect the camera to your network hub using a network cable as shown.
**IPCam Master**

Use the supplied IPCam Master software to find the IP camera on a network and configure basic settings.

Before connecting the camera to a network, you will need to connect it directly to a host computer and run IPCam Master to set an IP address and other network settings.

See the user manual for more details about how to use the IPCam Master software.

---

**Using the Browser**

You can view the IP camera output using a standard web browser.

Enter the camera IP address in the browser address bar to connect to the camera.
